

Onehunga Transport Engineering NZTTMF Member Since: 1996

Onehunga Transport Engineering Ltd (OTEL) is a specialist truck body and trailer manufacturer based in South Auckland. They specialise in fitting out vehicles for the power, tree maintenance, contracting and roading sectors. They are also New Zealand agents for Altec products.

OTEL offers a range of services and capabilities, from building various body types for the power and transport industry to general engineering requirements through to providing structural beams for the building sector and various modifications for transport vehicles. A full range of certification for legal and road transport requirements is also provided in-house.

The cornerstone of OTEL's service delivery is its versatility. It can design, manufacture or improve just about anything for the transport industry, and promises no job is too small or too large for it to handle.

The core range of services includes vehicle builds, machinery and equipment, engineering and structural.

From its inception in 1995, the company has steadily built a reputation for quality assurance and an impressive record of accomplishment for delivering on time and on price.

Its self-imposed standard is excellence, and this has attracted a growing and loyal customer base to its South Auckland plant.

OTEL has been New Zealand's only Altec agents since 2006. The Altec range is the world leader for power, roading, contracting and tree maintenance equipment. Specialist equipment includes aerials, digger derricks, cranes, cable handlers and wood chippers.

Altec and OTEL have similar values, placing the customer first and declaring people and teamwork as their greatest strengths.
