

Best Bars

NZTTMF Member Since: 2014

Best Bars is a south-Auckland based designer, manufacturer supplier and exporter of precision and bespoke towbars, nudgebar, bullbars and automotive accessories. Its focus to date has been the passenger vehicle market, servicing most makes and models, and becoming the preferred supplier of genuine and approved accessories for many of Australasia's leading motor vehicles.

More recently Best Bars has moved assertively into the heavy transport market offering genuine part towbars, nudgebar and worksteps to select truck distributors, this in addition to offering COF custom built towbars for general owner operators. Common to these accessories, and to those for the cars that preceded them, is attention to quality. The company is uncompromising in its quality controls and validation processes. It describes its controls and safety standards as rigorous, robust and demanding, meeting ISO/TS 16949 quality accreditation requirements. "Anything less than the best is unacceptable to Best Bars."

Every heavy transport product within the Best Bars range meets or exceeds international automotive and safety guidelines and standards. The company is ISO/TS16949 (Quality), ISO14001 (Environment) and ACC (OH&S) Tertiary Level certified. It has also won numerous awards, including QBE Exporter of the Year and ATEED Leadership Excellence further validating its reputation as a high-end supplier of quality products for the transport industry.
