

Situated in Tokoroa, Evans Engineering is a heavy engineering company specialising in logging transport.

Its reputation for service, a key element in the company, started in 1945 when Jack Evans opened a blacksmith shop, basing his operation on quality work and delivery – this has continued throughout the company development.

During the 1950s, Evans Engineering Company Limited transformed into a general engineering company. The emphasis then was on agricultural work.

As the company grew with the forestry expansion around it, they moved into manufacturing earth moving and logging equipment.

Then, in the 1980s, it started to specialise in logging transport—now, its core business.

Today, Evans Engineering is a market leader in the design and production of trailer equipment, not only in New Zealand but also in export rich countries.

The majority of Evans' work is in new logging trailers, in high tensile steel, and associated truck equipment. However that is far from the whole story. Evans Engineering also upgrades old trailers with the latest technical innovations, and builds low bed heavy haulage trailers and earth moving machinery.

They also design and manufacture specialized chassis and dollies for all types of road tankers.

The company is New Zealand representative for Vulcan on-board weighing scales, manufactured in USA and for Swedish owned transport solutions specialist ExTe alloy bolsters.

Evans' history of expansion and commitment to service would not have been possible without a dedicated and skilled workforce. Evans Engineering Company Limited is able to deliver what truck drivers and operators want – efficiency, quality and service.

The company's growth can be attributed to many factors, including commitment to customers, innovative approach to problem solving, continual product development and most importantly – satisfied customers.

The same attributes that have elevated Evans into its present position are still prevalent today and will help carry it well into future.

WHO: Evans Engineering Co. Ltd.

WHERE: Tokoroa.

WHAT: Market-leading trailer design and build for the logging industry.

WEBSITE: <http://www.evanstrailers.co.nz/>

EMAIL: [evansengco@xtra.co.nz](mailto:evansengco@xtra.co.nz)

Phone+64-7-886-5569.

WHO TO ASK FOR: George Walter.

WHAT TO ASK FOR: International class trailer builds and services.
