

## Intertruck Distributors NZ Ltd

NZTTMF Member Since: 2007

**Intertruck** is the NZ importer, distributor and dealer for International trucks.

Because of NZ's unique vehicle configurations, in 2004 the company also secured manufacturing rights to assemble International trucks here.

Their assembly operations are supported by a large and highly experienced design and engineering team. Operating the latest CAD Solid Edge software ensures consistent and identical materials to produce the same quality every time.

Intertruck also provides custom builds for those needing special requirements. Beginning with blank frame rails, each chassis is uniquely drilled giving frame integrity ensuring no unnecessary holes. Custom building provides options such as a fuel tank position change to mount a special component. Endless options are available in chassis layout, including lazy, pusher or tri-drive configurations. Bare cab shells allow flexibility in cab trim with wiring harnesses designed specific for NZ, such as ERoad, RT/CB, phone, night-lights, cameras etc. Intertruck works closely with trailer manufacturers to optimise HPMV layouts for rigid trucks.

All Intertruck custom builds operate within Navistar's engineering principles and guidelines to ensure vehicle compliance and reliability are not compromised.

Intertruck delivers a completed vehicle under one roof, factory fleet painted, with 5th wheel ready for work, and includes finance and lease packaging.

**Who:** *Intertruck Distributors NZ Ltd, celebrating over 20 years in business and supporting local manufacturing.*

**Where:** *Dealerships in Manukau City, Mt Maunganui, and Christchurch*

**What:** *Manufacture and custom build providing many value added reasons International to be your choice of truck with NZ wide dealer support.*
