

## Mackenzie Welding 2013 Limited

NZTTMF Member Since: 2001

The NZTTMF's northern-most member is one of those engineering companies that are the back-bone of provincial New Zealand.

As general engineers and welders, Mackenzie Welding can handle anything thrown at them. And in their 30 years they probably have. Don Mackenzie and his team describe themselves as "The Smartest Working Shop in the Steel Business."

It is not an empty boast.

The team is involved with massive projects in the north. Many of the landmark buildings in and around Kaitaia have been constructed by Mackenzie Welding. They've built numerous hiab crane trucks and countless alloy boats, including their largest marine project: an 18 metre by 6 metre mussel barge.

And they offer crane hire.

But it is their work in the transport sector that they are renowned for most. And that work, and reputation, extends way beyond Northland. The mainstay of the business has always been the heavy transport and forestry industries. The company fabricates truck decks and trailers throughout Northland, but it also has a strong customer base in Auckland, and its alloy ute decks have made their way as far as Christchurch.

Their services include fabrication, overhauls, customising, design, repairs, machining and precision engineering, and structural buildings.

Due to transport operator demand, the company now offers an extensive range of truck parts and accessories, and the workshop range has also expanded to include a selection of Caltex oils.

The company also stocks an extensive range of consumables, steel stock, aluminium and stainless steel.

**WHO:** Mackenzie Welding.

**WHERE:** Kaitaia, Northland.

**WHAT:** High performance customised trucks and logging trailers.

**WEBSITE:** <http://www.mackenziewelding.co.nz>

**EMAIL:** [macwel@xtra.co.nz](mailto:macwel@xtra.co.nz)

**PHONE:** 0-9 408 0535.

**WHO TO ASK FOR:** Don Mackenzie.

**WHAT TO ASK FOR:** The Smartest Working Shop in the Steel Business.
